

Burando
offers a unique One Stop Shop
concept to the maritime industry

BURANDO
MARITIME
SERVICES

Leading in maritime services

About us

Burando Maritime Services offers a unique combination of services and products in a One Stop Shop concept. Our clients, both inland and seagoing vessels visiting the ARA region, can be assured of a smooth and convenient port stay.

Our motto is "a deal is a deal" which is typical for the Rotterdam hands-on mentality. Customer satisfaction is one of the company's key objectives and we take pride and satisfaction in exceeding our customers' expectations. This is achieved by proactive involvement with the customer from a problem-solving and service-focused approach. Being up-to-date in the latest market developments, in combination with our customer-orientated approach accentuates and further amplifies our maritime services. Burando is fully aware of its activities and their potential impact on the environment and surroundings. Taking care of People and Planet is one of the key points in the company policy. All activities are carried out to the highest safety and health standards.

Sustainability

Burando Maritime Services supports the objectives of the Rotterdam Energy and Climate initiative. We are involved in developing new methods to reduce emissions, as well as finding alternative and improved energy sources. Through many years of experience, we have seen that a responsible and sustainable company policy contributes to the reputation, continuity and profitability of *Burando Maritime Services*.

Burando Maritime Services

Is the leading service provider within the maritime industry. Within Burando Maritime Services over 250 employees are working enthusiastically to provide pro-active and result orientated solutions to its customers. Main objective is achieving maximum customer satisfaction.

Quality and Certification

All the Burando Companies are market leaders in their segments and play a very strong and innovative role within the maritime industry. The Burando companies are certified according to ISO 9001, ISO 14001 and the Safety, Health and Environmental Checklist Contractors (SCC), relevant for the type of operation.

Burando Oil Logistics

Activities within this group cover the transportation and storage of heavy fuel products and the supply and trade of Marine Gasoil products. The companies are:

Service Terminal Rotterdam

With its unique location in the Botlek area STR provides efficient and reliable maritime / transshipment services to ship owners, charterers, traders and port agents. In a joint venture with the Russian oil major Lukoil, STR operates a 240.000m³ Fuel oil tank storage facility which serves the ARA bunker market.

FTS Hofftrans

A state of the art and double hull bunker barge fleet with a total capacity of over 70.000 mt. FTS Hofftrans ensures its customers excellent services, flexible operations and timely delivery.

Trefoil

With global gasoil trading and physical supply activities in the ARA region Trefoil is your trusted gasoil supplier. A modern fleet of dedicated gasoil supply barges guarantees a flexible, smooth and on-time delivery.

Burando Maritime Logistics

A wide range of services offers vessels a unique "One Stop Shop" through its subsidiaries:

Ship Spares Logistics (SSL)

Modern road trucks, minivans, 4 unique crane barges and efficient warehouses makes SSL the leading maritime logistic service provider in the ARA region! Motivated and proactive employees are the key elements for a high quality 24/7 and on-time delivery of your (bonded) stores, provisions and spare parts.

Fendercare Benelux (FCB)

A joint venture between Burando Maritime Services and Fendercare Marine Solutions. Global leader in STS transshipments on behalf of the oil majors, suppliers and traders. With FCB, Burando manages all your operational needs for fender and hose rental services. Burando Customs Services (BCS) The independent customs service provider and broker. Offering the best customs solutions for your logistic, administrative and fiscal challenges.

Burando Rental Services (BRS)

With Burando Rental Services we provide various power packs and hydraulic driven pumps. Our quick response team is 24/7 available with advice and solutions in difficulties with liquid bulk cargoes to both maritime and industrial clients.

Burando Customs Services (BCS)

The independent customs service provider and broker. Offering the best customs solutions for your logistic, administrative and fiscal challenges.

Ship Spares Logistics

Ship Spares Logistics (SSL) is the leading maritime logistics company in the ARA Region. Serving the Shipping-Offshore and Petro Chemical industries.

With over 4 decades of experience, Ship Spares Logistics (SSL) can handle all your logistical needs and combines service and personal attention within your budget 365 days a year on one telephone number with one familiar contact.

Ship Spares Logistics (SSL) with bonded and free warehouses located in the ports of Rotterdam and Amsterdam, combines excellent road and direct waterfront connections. The warehouses are used for consolidating shipments from multiple suppliers for an efficient onboard delivery, short- and long term storage.

Our 4 modern and unique crane barges are the essential link for Onboard delivery! Ship Spares Logistics is ISO 9001 certified and it's crane barge 2 holds the SCC certificate (Safety, Health and Environment Checklist Contractors (SCC)) which allows to work on tank terminal jetties and quays.

Our services consist of:

- 5000m2 warehouse for both short- and long-term storage of all types of spares and (bonded) stores
- 4 unique crane barges with a lifting capacity upto 11 tons and a loading capacity of 300 ton
- Own trucks and vans for onboard delivery of small parcels upto full loads
- Onshore- and onboard refrigerated and temperature controlled storage
- Online track and trace of delivered and returned goods through our website
- Custom brokerage
- Supervision on delivery, signing the involved delivery receipt by the ships staff
- Assistance for repairs on terminal jetties and quays
- Daily Rotterdam-Amsterdam shuttle services
- Sea- and Airfreight services to every destination Worldwide

Leading in maritime services

Service Terminal Rotterdam

STR offers multiple jetties quay facilities and provides solutions when Transshipment, Nitrogen or lay-by services are required.

Burando Maritime Services offers a unique combination of services and products in a One Stop Shop concept. Our clients, both inland and seagoing vessels visiting the ARA region, can be assured of a smooth and convenient port stay.

By its unique location in the Botlek area, STR offers a fully utilized berth with a total quay length of over 450 meters. The main activities can be subdivided into the following core operations.

STS (Transshipment) and Lay-by services. Service Terminal Rotterdam met the increasing need for reliable and efficient port services to ship owners, charterers and port agents. Multiple jetties and its unique location in the Rotterdam-Botlek area provides the right logistic services and speeds-up your vessels port turnaround time.

Storage of heavy fuel oil products through its joint venture with Russian oil major Lukoil. With its new built ocean jetty STR is able to receive vessels with a maximum LOA of 270 meters. Through its import, storage and export activities STR serves the Antwerp-Rotterdam-Amsterdam (ARA) bunker market. With dedicated Fuel Oil tanks STR has a total storage capacity of 235.000m³.

Key figures:

- Reliable partner for your lay-by and STS services 24/7
- ISO 9001, ISO 14001 and ISPS certified
- Transfer hoses, fenders (Yokohama Type) stand-by
- Tank cleaning and disposal services into our collection barges
- Nitrogen for purging cargo tanks and N₂ blankets

Leading in maritime services

Burando Rental Services

Burando Rental Services is 24/7 available with advises and solutions in difficulties with liquid bulk cargoes to both maritime and industrial clients.

Burando Rental Services combines its high qualified mechanics and field technicians with a variety of pumps and power packs in order to minimize its clients down time in the event of a:

- Emergency breakdown
- Onboard pump failure
- New system test
- Accidental damage
- Short and long term rental period
- Repairs and maintenance

Its unique and central location in the Botlek area ensures a swift response to clients and any ships type which require immediate assistance. This can be guaranteed due to efficient logistics by means of road trucks, multiple pontoons and a direct waterfront connection.

Liquid ship-to Ship or landside tank transfers could experience emission and odour problems. Our pump systems together with the Nature Ecoscrub mobile units or active coal filters confine further delays in your operation.

For each liquid transfer, such as highly viscous products, heavy fuel, vegetable oil and chemicals Burando Rental Services has the equipment. To maintain the highest level in efficiency and services the following pumps can be supplied anywhere at anytime:

- Hydraulic driven and very compact powerpacks
- Various booster pumps which can be installed on fixed onboard systems
- Submersible pumps driven by the ships hydraulic system or Burando powerpack

Combining the Burando Maritime Logistic services with our customer-orientated approach Burando Rental Services is the provider for each liquid transfer!

Leading in maritime services

FTS Hofftrans

Market leader in the transportation and supply of fuel oil products in the ARA region.

Service is the keyword for FTS Hofftrans. In order to maintain the highest level in service and quality, the company holds the international quality, environmental certificates ISO 9001, ISO 14001 and complies to the EBIS requirements.

We ensure that the quality standards of our barges and crew are maintained by a program of stringent internal inspections and ongoing training schemes. Through a progressive and ambitious company policy we also achieved our objective of a 100% double hull bunker fleet, underlining the market leadership of FTS Hofftrans.

Optimal planning and efficient logistics:

On behalf of the oil majors and independents, FTS Hofftrans is the logistic extension for the physical 'bunker supply' and inter-refinery transport of Fuel oil products. With the launch of our newest barges, equipped with the latest generation of computerized fuel blenders, efficient logistics and flexibility in the grades supplied can be guaranteed: anywhere at anytime!

Streamlined and more efficient cargo operations at container terminals resulted into shorter port turnaround times. The increased scale of the launched container vessels means larger bunker quantities to be supplied. Powerful pumps enable our barges to supply fuel oil with a maximum up to 1.800m³ p/hour.

Ready for the future:

When the new regulations for the Sulphur, Emissions Controlled Area (SECA) came into force, FTS Hofftrans had already anticipated by the launch of dedicated Low Sulphur barges in the ARA region!

Leading in maritime services

Fendercare Benelux

Global provider of ship-to-ship transfer operations and related STS equipment to both maritime and offshore industries.

Fendercare Benelux is a joint-venture between Burando Maritime Services and Fendercare Marine. Fendercare Benelux offers its customers a total package for a reliable and safe ship-to-ship transfer. Through its broad network and profound knowledge of the ports in the ARA region Fendercare Benelux provides fenders, hoses, and the expertise of a superintendent for all liquid bulk transfers.

With Fendercare Benelux we differentiate two services: ship-to-ship packages and the local rental activity. During the ship-to-ship transfers the entire operation is supervised by one of our superintendents. Unlike the STS operations we can also provide individual components for your liquid bulk transfer via our rental service.

Through multiple depots in the Port of Rotterdam and Amsterdam the right STS equipment for crude oil, mineral (CPP and DPP), chemical and alcohol products can be supplied at any time. All supplied equipment meets the highest standards as prescribed by the OCIMF and ISGOTT.

Fendercare is the best known and largest Yokohama fender stockist in the world. From our depots a variety of Yokohama fender types can be supplied. With diameter and length ranges from 1.2 x 2.0 meters up to the largest 3.3 x 6.5 meters Yokohama Pneumatic fenders. Fendercare Benelux has the equipment for any ship in the ARA region and guarantees a safe, efficient STS mooring and liquid cargo transfer!

Key figures:

- Company policy and procedures in accordance with the ISGOTT and OCIMF standards
- Fendercare Benelux is ISO 9001 and SCC certified subcontractor
- Multiple Yokohama fenders 24/7 available
- Reliable 24/7 delivery through sister companies SSL and Service Terminal Rotterdam
